How to get to the Singles Plus FTP Site

From: Pre-Press info@sppinc.biz
Subject: How to get to the Singles Plus FTP Site

You can use any ftp program to access our ftp site.

The following information is for people using the following operating systems:

PC:Windows 7, Vista, XP

Macs Using OS X 10.5 or newer (For people using 10.4 see last paragraph for links)

We Recommend that you use the Firefox browser with the FireFTP plugin. These are free programs that you can download and used as your main Web browser. We will give you the links below which you can click on and access the websites to download the Firefox browser and once you have that installed you can click on the FireFTP link to go to where you can have it install into your Firefox browser for you.

For Firefox go here:

<http://www.mozilla.com/en-US/>

Once that is installed on your computer go here for the FireFTP plugin:

<http://fireftp.mozdev.org/>

Before sending anything PLEASE compress all your files so that you are sending only one file to us and name it so we will know it is from you. Then always send us an email letting us know you have placed a file on our ftp site. Email us at info@sppinc.biz

Once FireFTP is installed you go under the Tools section in the Firefox Menubar and click on FireFTP. This will open a new window or Tab in Firefox. Go to the upper left and open the pull-down menu to where it says create an account. The Account Manager pops open and here is the information to type in the spaces:

Host: sppinc.biz

Login: graphicssppincbiz

Password: Prepress1

Account Name: SPP FTP Site

Press on the ok button at the bottom and now you can use that same pulldown and click on SPP FTP Site and click on the connect word to the right. The split window on the right side is our FTP site and the left side is your computers hard drive. On the left side use the browse and choose where on your hard drive you want to upload from or download too. All you have to do now is highlight the file and press the correct arrow that points to the window you want the file to move to. On the bottom of the Firefox window you will see all the information to tell you how large your file is and the progress of the transfer.

If you are using a Mac with OS X 10.4 please go the following links to download an earlier version of Firefox and FireFTP Plugin.

For Firefox go to

<http://www.mozilla.com/en-US/firefox/all-older.html> and download version 3.6

For FireFTP go to

<https://addons.mozilla.org/en-US/firefox/addon/fireftp/versions/> and get version 1.0.10

If you have any questions please call us at 630-932-8484
